# **PROJECTS**

### HireMe

### **Web Development**

- HireMe is a application which connects companies and developers where companies are the source of the resources and the
  developers can find and apply for their targeted job. Both having seperate signup and login page and can be verified using OTP
  to their email.
- Companies can register, create job posts, check developer's profile and can rejects their application, organize test for selected developers and can email test links with instructions.
- Developers can register, apply for jobs, editable profile (can update photo and resume), check their statistics, subscribed to companies and developer's chatroom.
- Tech Stack: Nodejs, Expressjs, ejs, Mongo DB, Bootstrap

# Chating-App

#### Web Development

- Full Stack Chatting App. Uses Socket.io for real time communication and stores user details in encrypted format in Mongo DB Database.
- For one to one chating and for group chating where admin can add and remove user from it .
- Tech Stack: Reactjs, Nodejs, Expressjs, Mongo DB, Socket.io
